

Install Opencast in **30 minutes**

...

It's essentially a speedrun...

What we do

Quickly install and configure all main components.

- Install **Opencast 9.3**
- Install **ActiveMQ**
- Install **Elasticsearch**
- Configure **SELinux**
- Configure **Firewall**
- Set-up **MariaDB**
- Configure **Nginx**
 - Reverse proxy
 - Terminate TLS

What we have

What I have prepared for this session

- Server
 - Machine with \geq 4GB RAM
- Operating system
 - CentOS Stream 8
- DNS record
 - `install.opencast.video`
- TLS certificate
 - Let's Encrypt works just fine

Let's go!

done.
